

Dear Health Care Provider:

The ECU Health Region 6 Team with the NC Rural Health Transformation Program (RHTP) is reaching out to those of you who work on the front lines of health care in eastern North Carolina. You see every day what is working, who is stretched thin and what simply is not available. That perspective is exactly what we need.

As part of the RHTP's ROOTS Hub for Medicaid Region 6, being lead by Access East, we are conducting a regional needs assessment to understand the state of health services and the health care workforce, as well as care coordination, including gaps across the area. The findings will inform how the NC ROOTS Hub prioritizes funding and programs over the next several years.

This survey is designed for practitioners, administrators, and stakeholders who work in or alongside health care systems in the region. It takes about 15 minutes to complete, and your responses are completely anonymous. We understand your time is precious, without your voice we will experience gaps in understanding what is happening in your community.

Take the survey here: [Health Care Professional Rural Health Survey](#)

Or scan the QR code:

The survey closes **8/15/2026**.

We also ask that you share this link with colleagues in your organization or network who work directly with patients and communities in Region 6, especially those who serve Medicaid patients or receive Medicaid services — the more perspectives we capture, the stronger and more accurate the action plan we can build.

Thank you for everything you do,

The NC Rural Health Transformation Program — Region 6 Team
